

Visual Logic: Structured Dialogue & Scenario Design

A High-Resolution Infographic
Approach to Language Learning

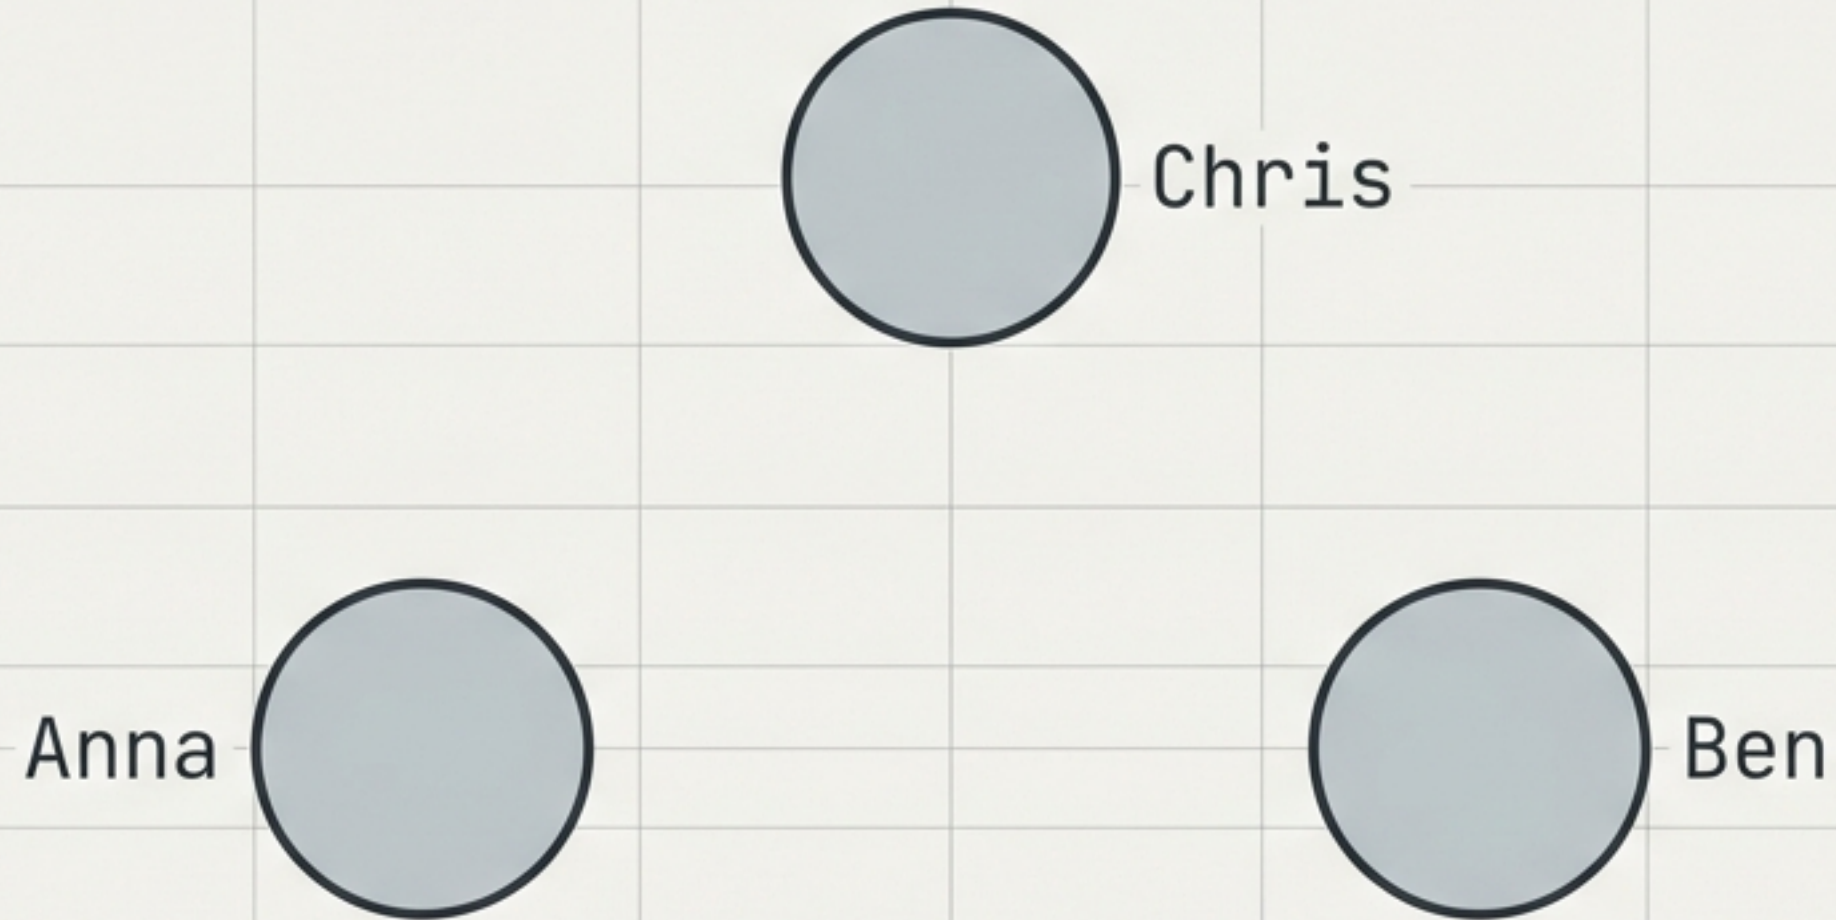

Designed for self-guided
study and visual decoding.

Decoding the Color System

We map conversation flow using color. Follow the path from Question (Pink) to Answer (Green).

Scene 1: The Classroom Network

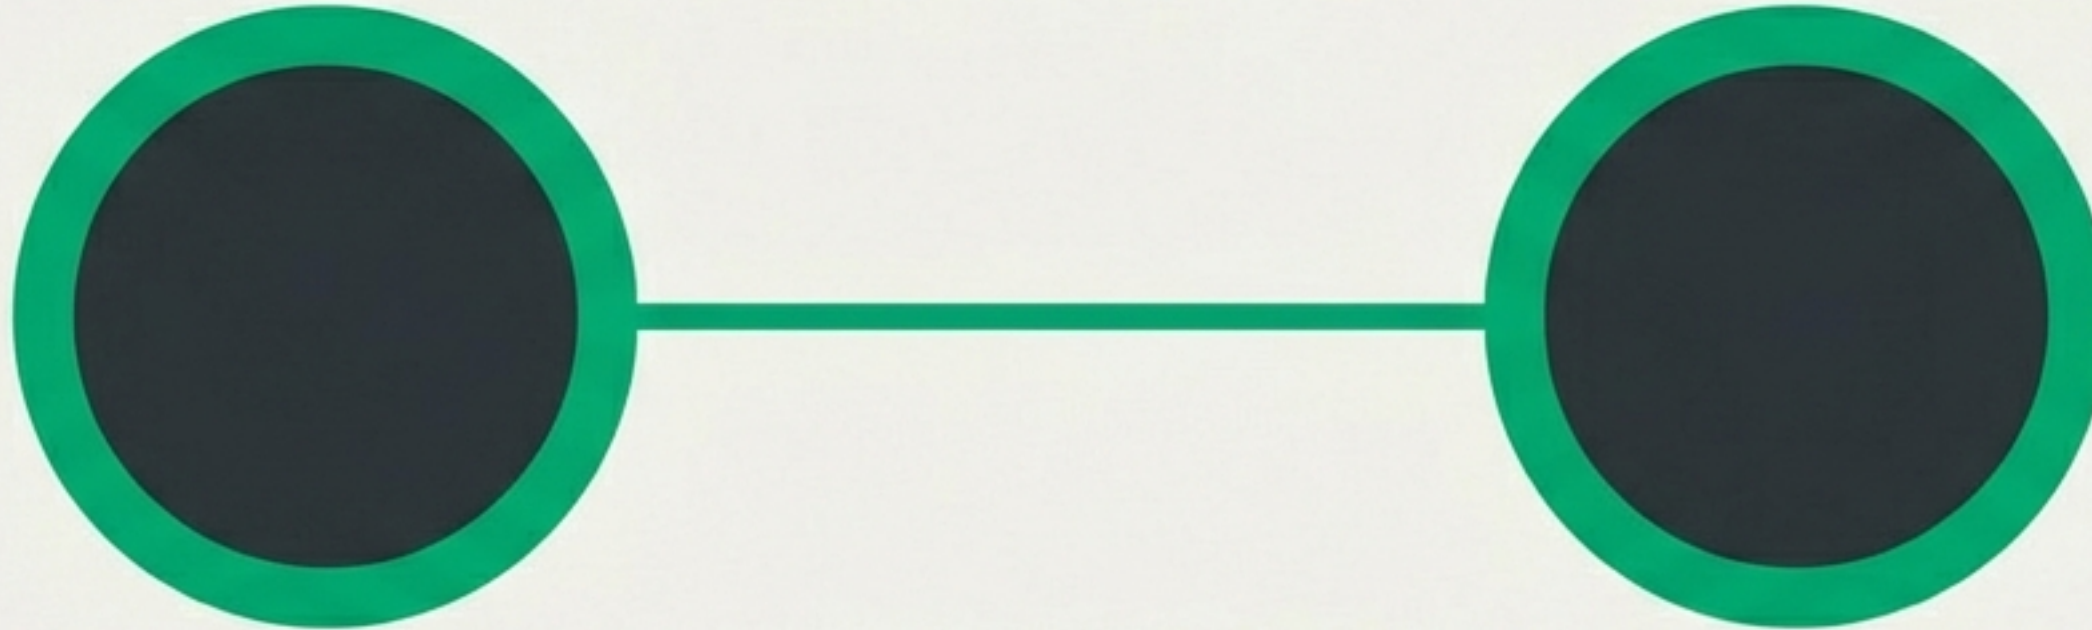

Objective: Establishing connections between strangers using a network graph metaphor.

Establishing the Connection

Hi, my name is Anna.

Hai, nama saya Anna.

Hi Anna, I am Ben. Nice to meet you.

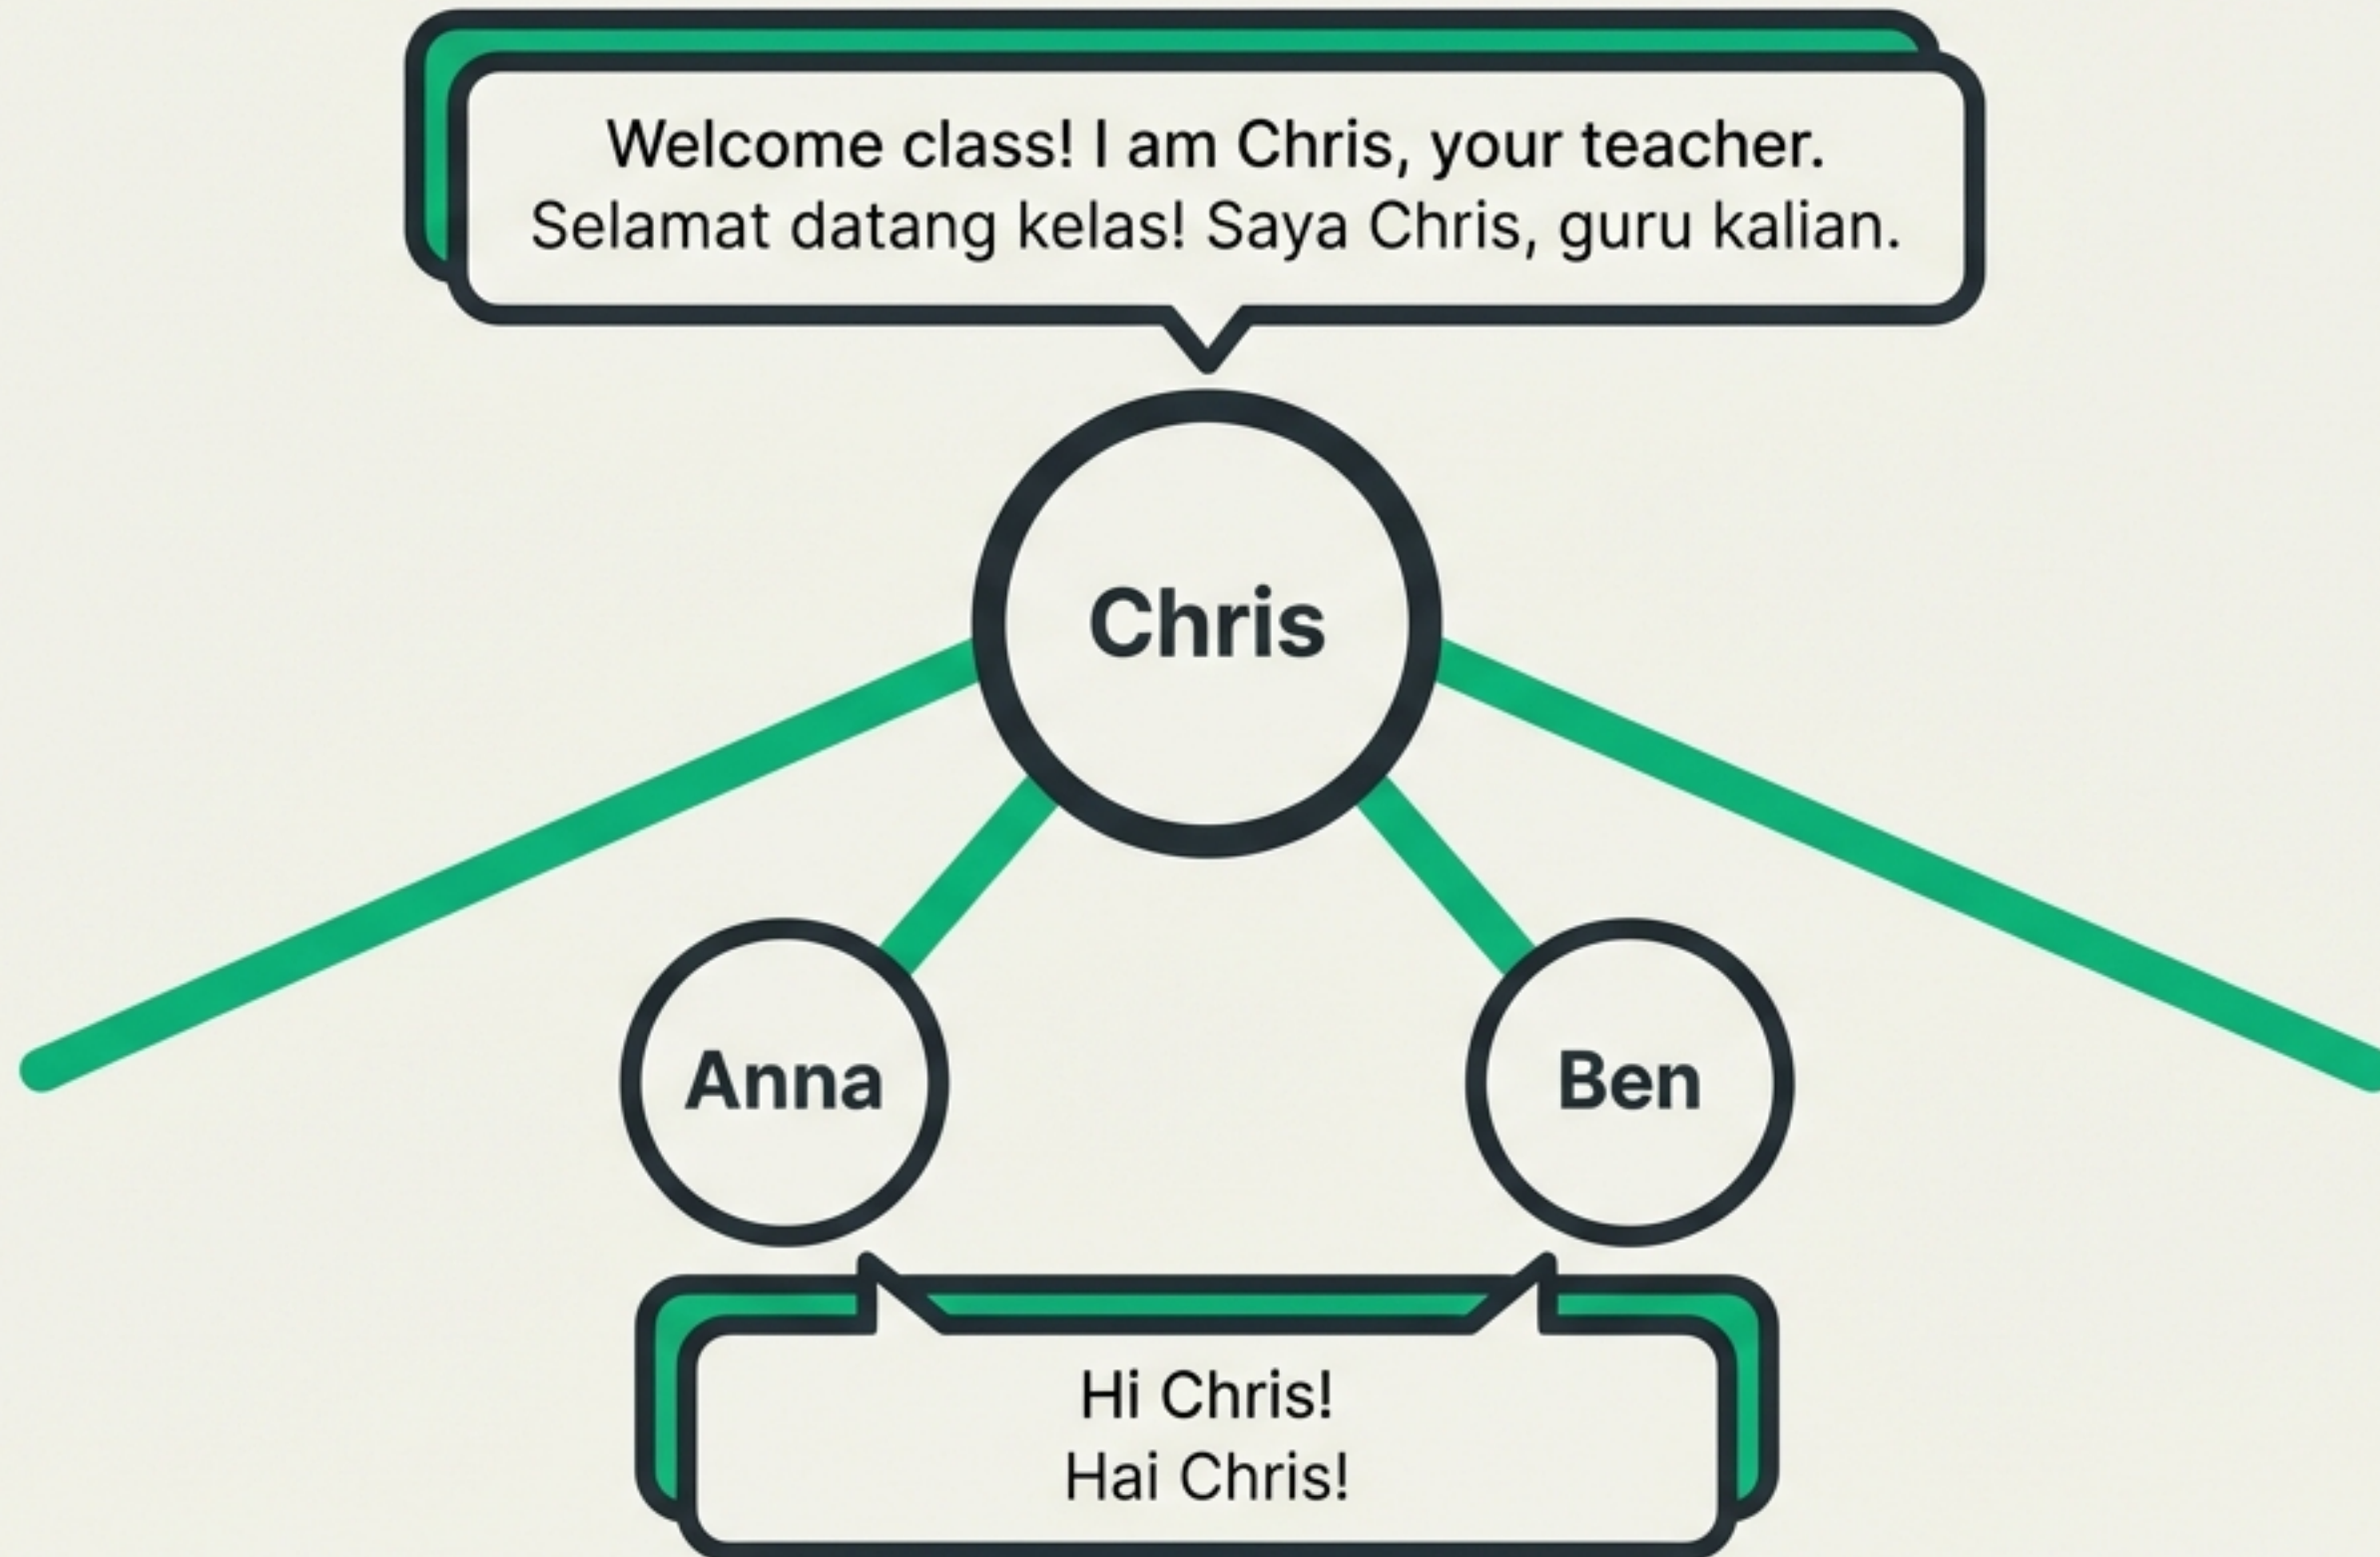

Hai Anna, saya Ben. Senang bertemu denganmu.

Querying Origin and Data

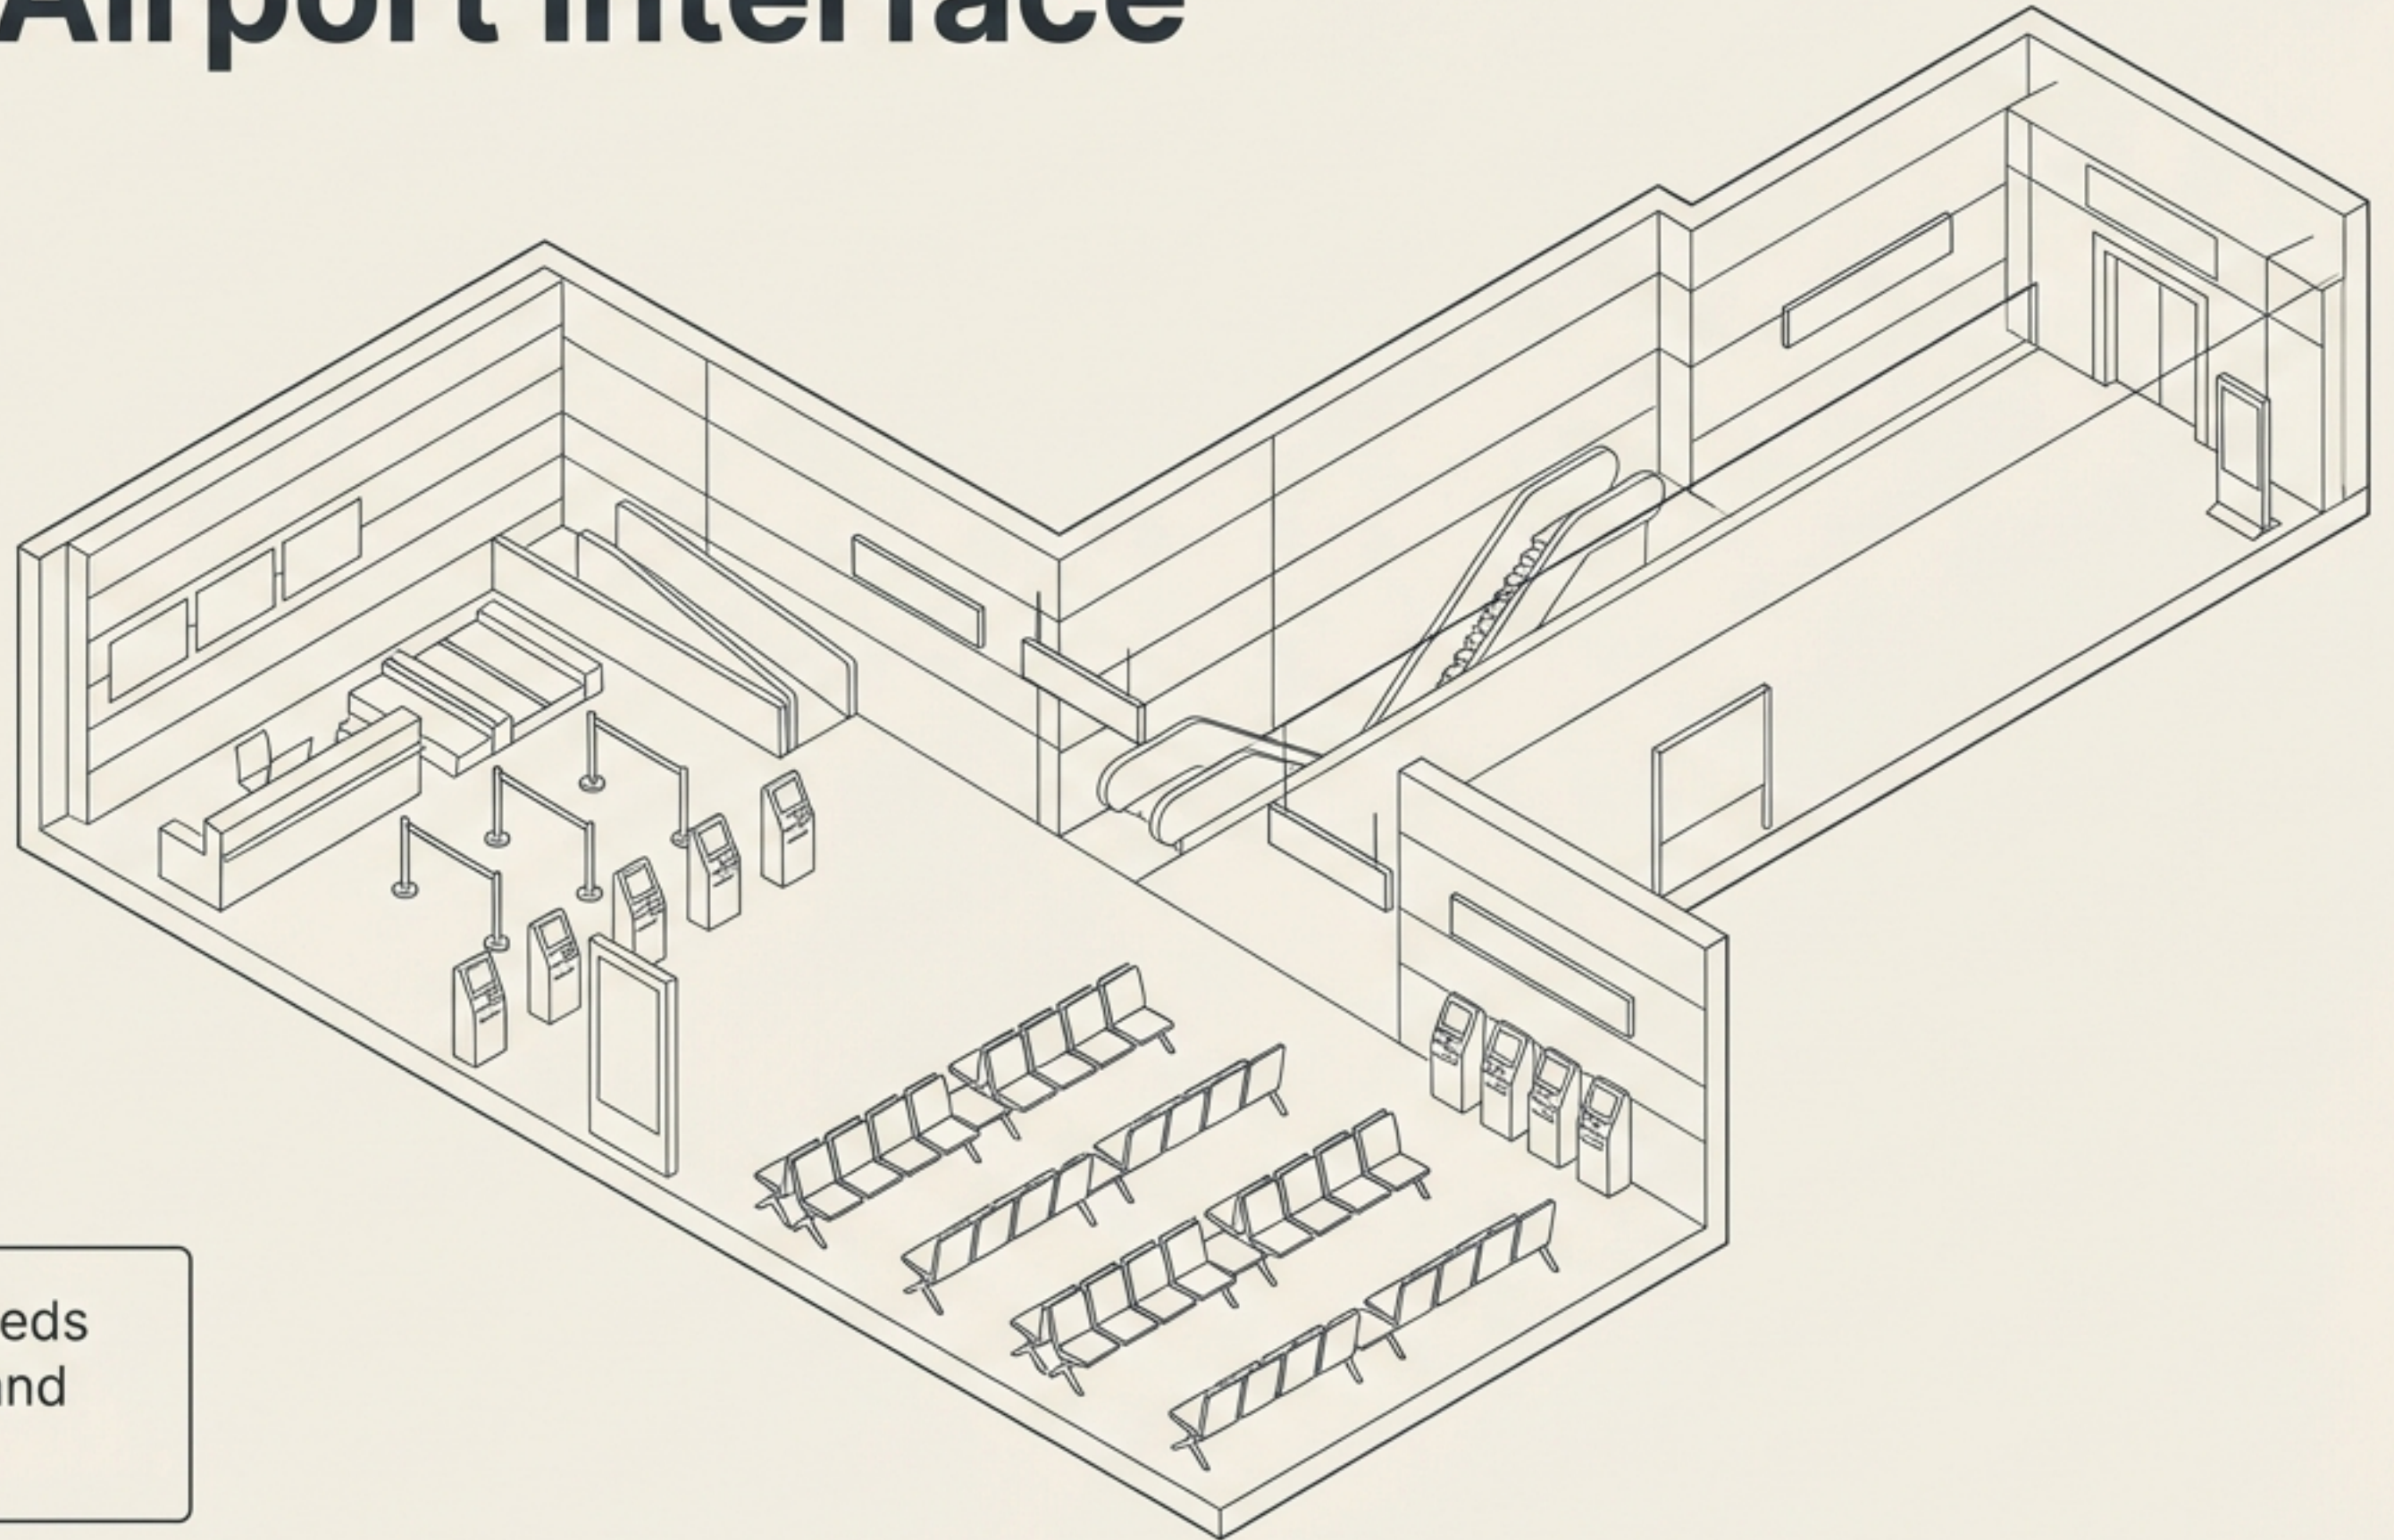

Pink asks the question. **Green** supplies the data.

The Central Hub Enters

Scene 2: Airport Interface

Objective: Navigating needs and directions using UI and Wayfinding metaphors.

Status: Not Checked In

"Excuse me, I am here to check in."
Permisi, saya di sini untuk check-in.

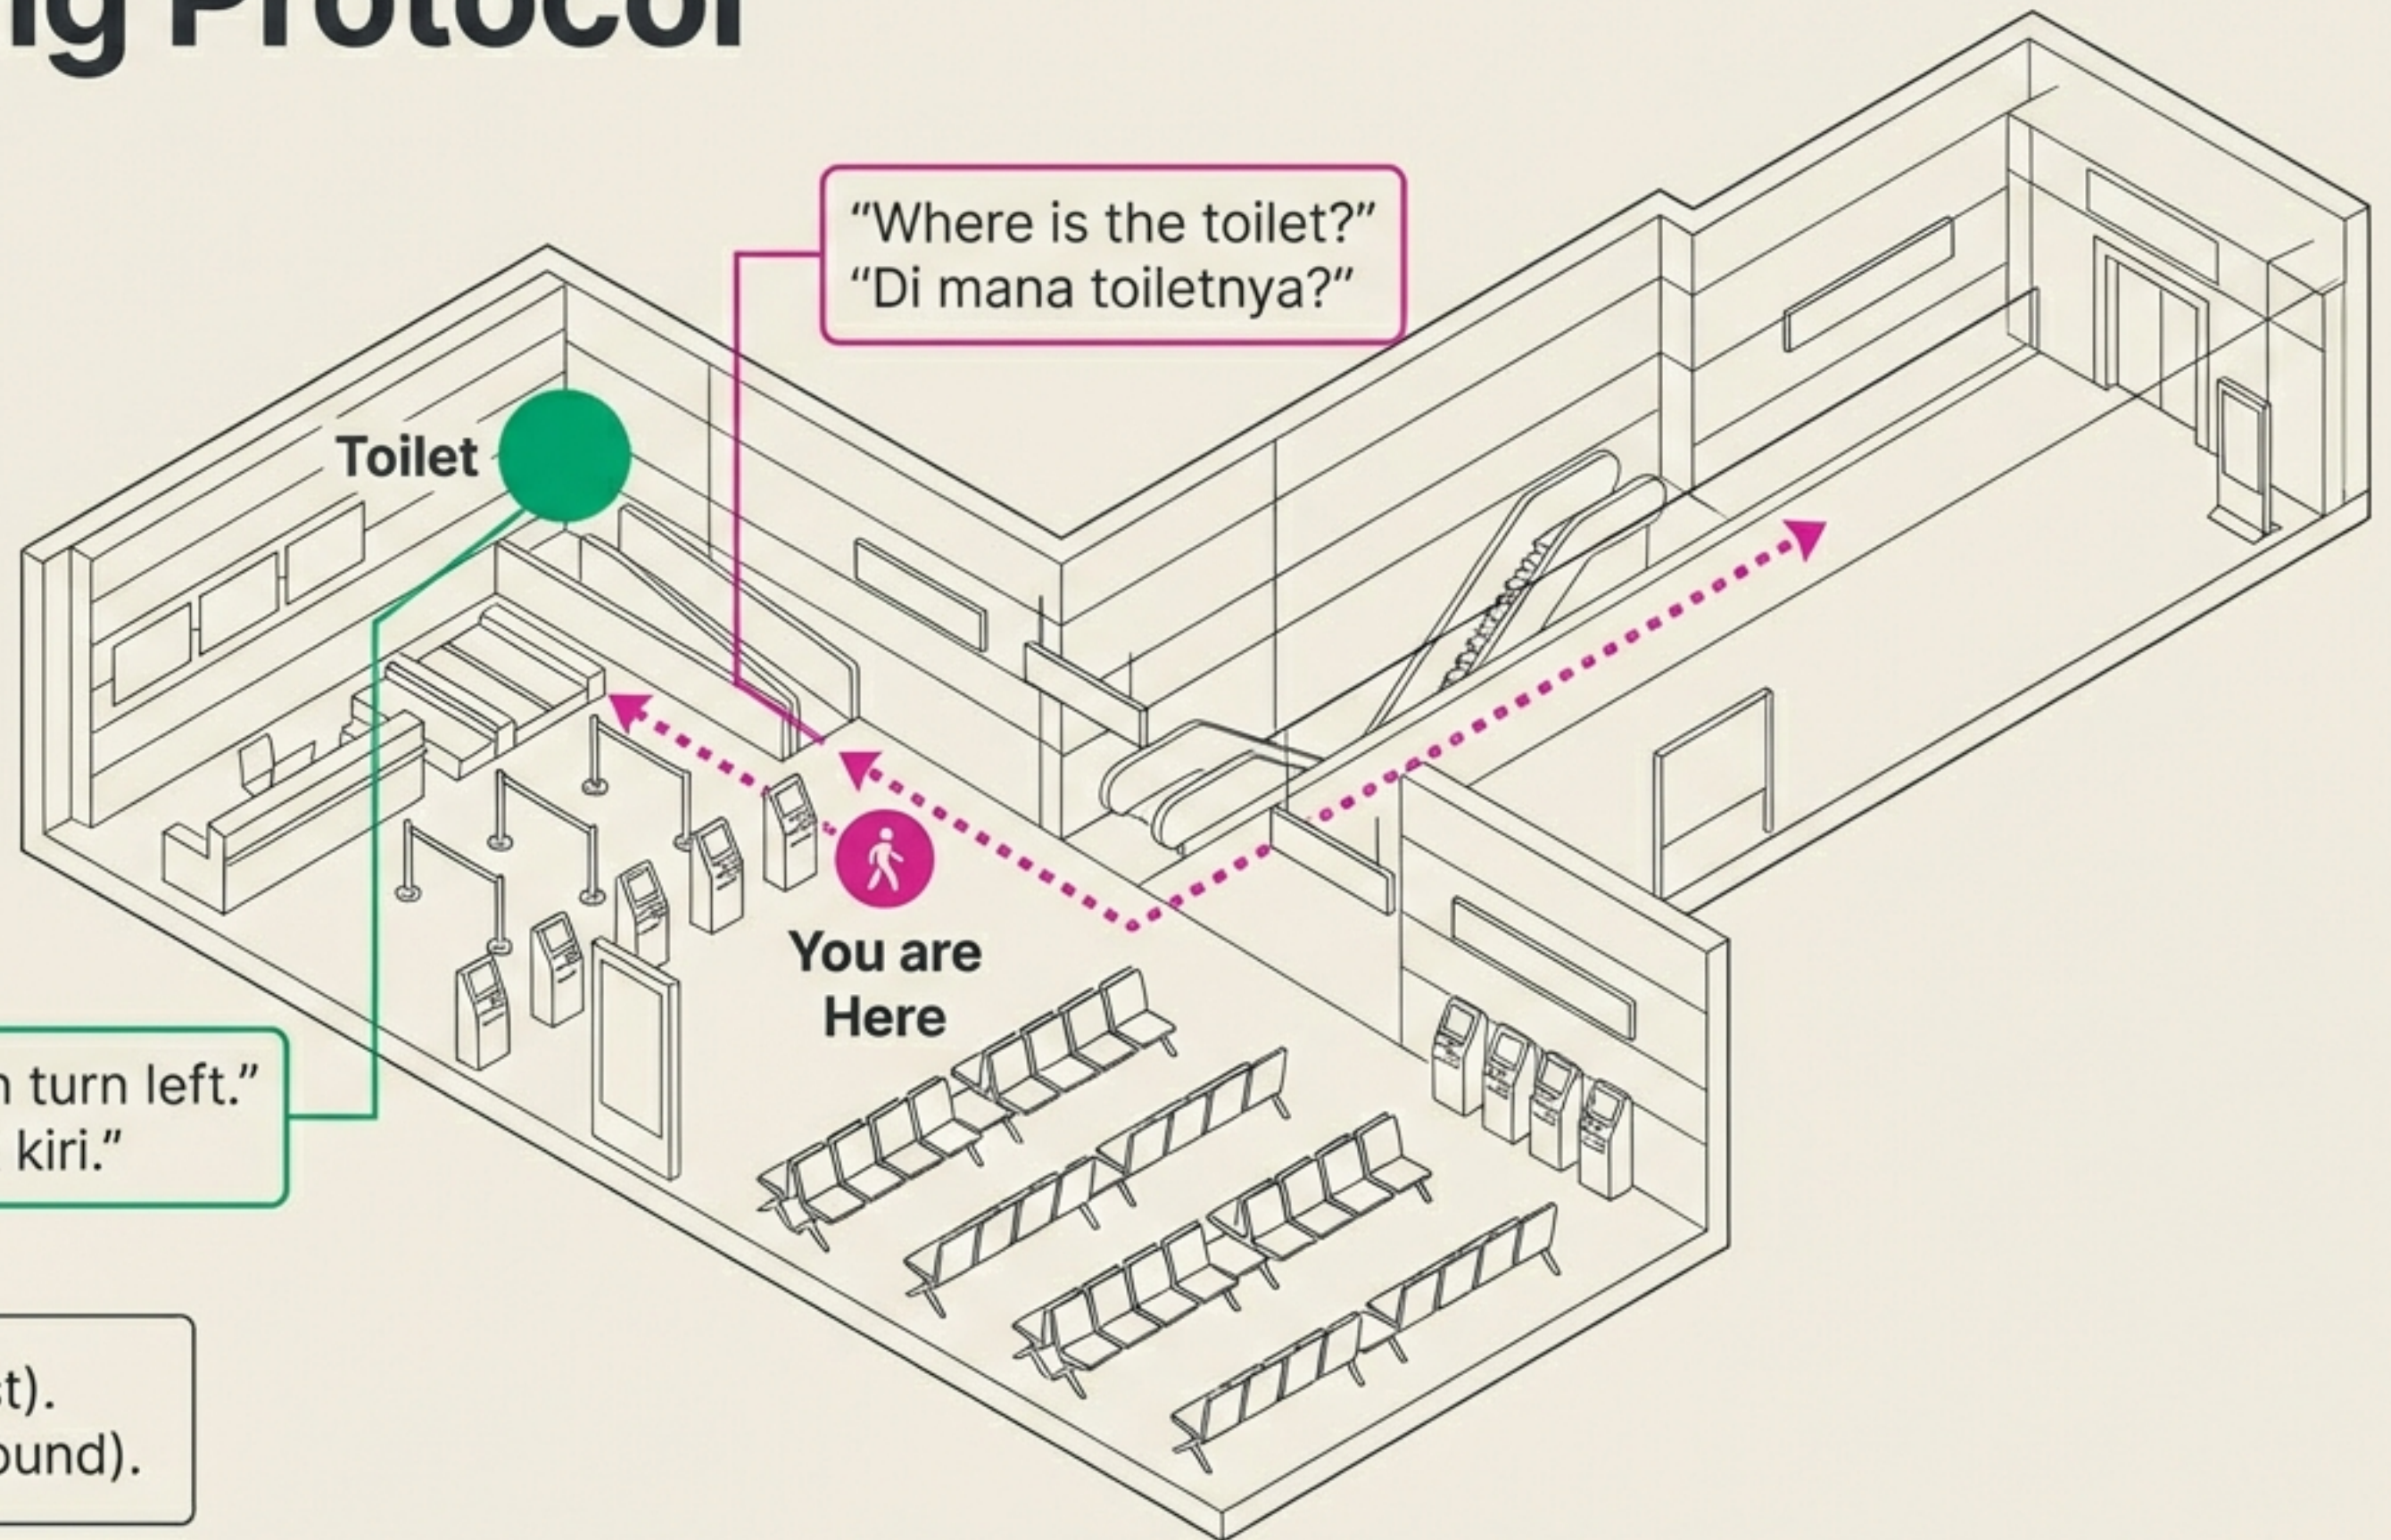

"Passport, please."
Boleh minta
paspornya.

STATUS: NOT CHECKED IN

"Passport, please."
Paspornya untuk check-in."

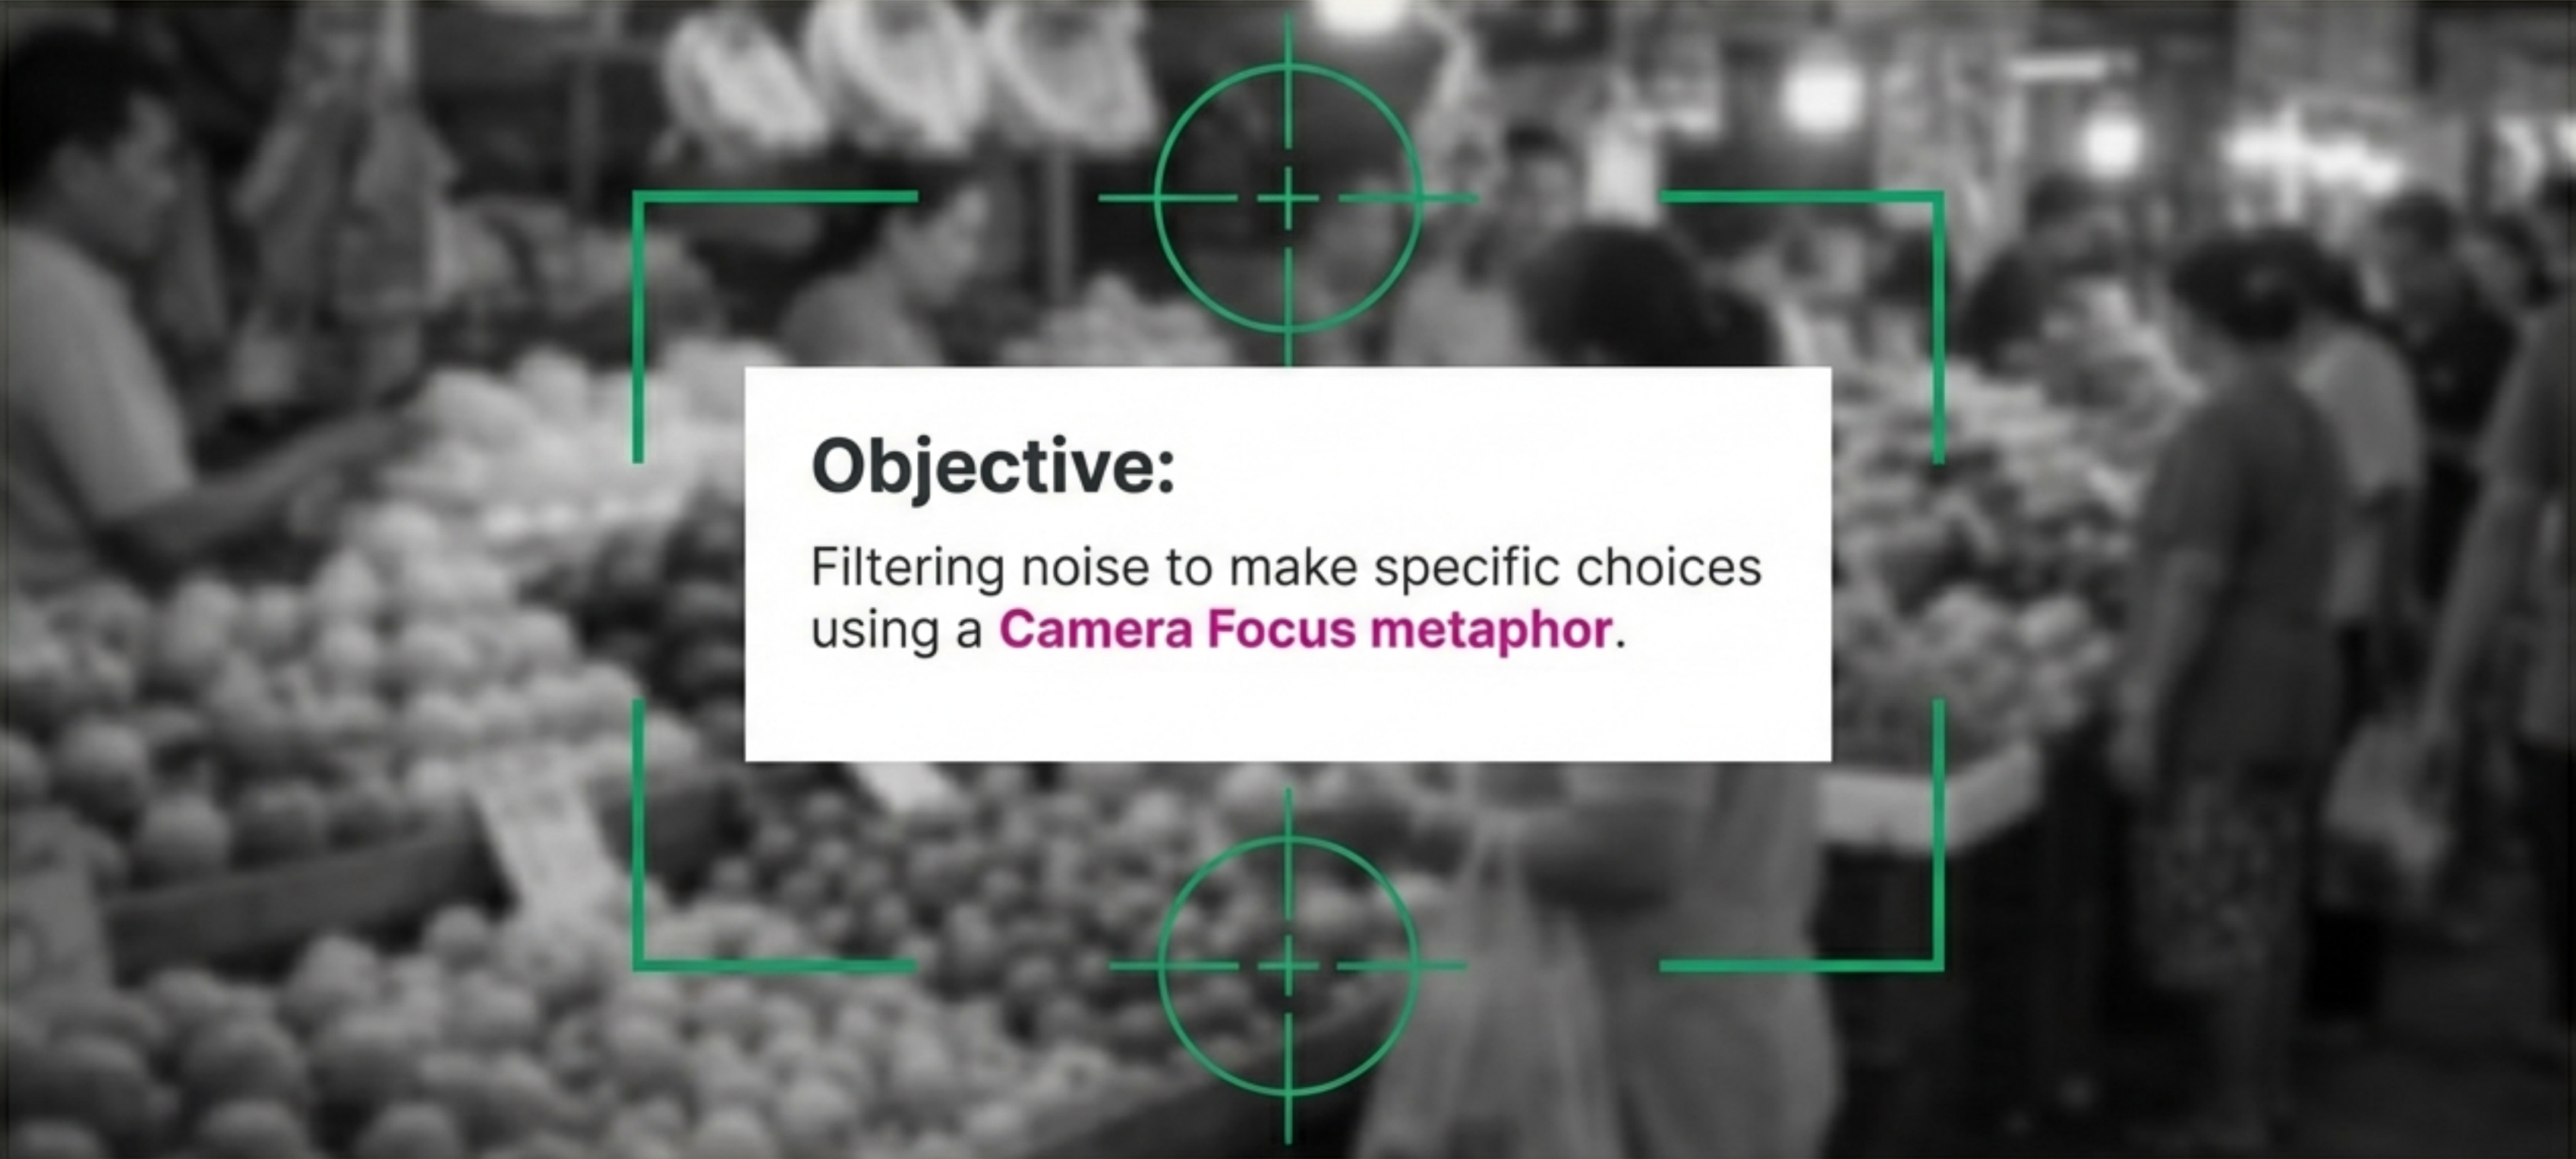

Check-in Desk

Wayfinding Protocol

Pink is the problem (Lost).
Green is the solution (Found).

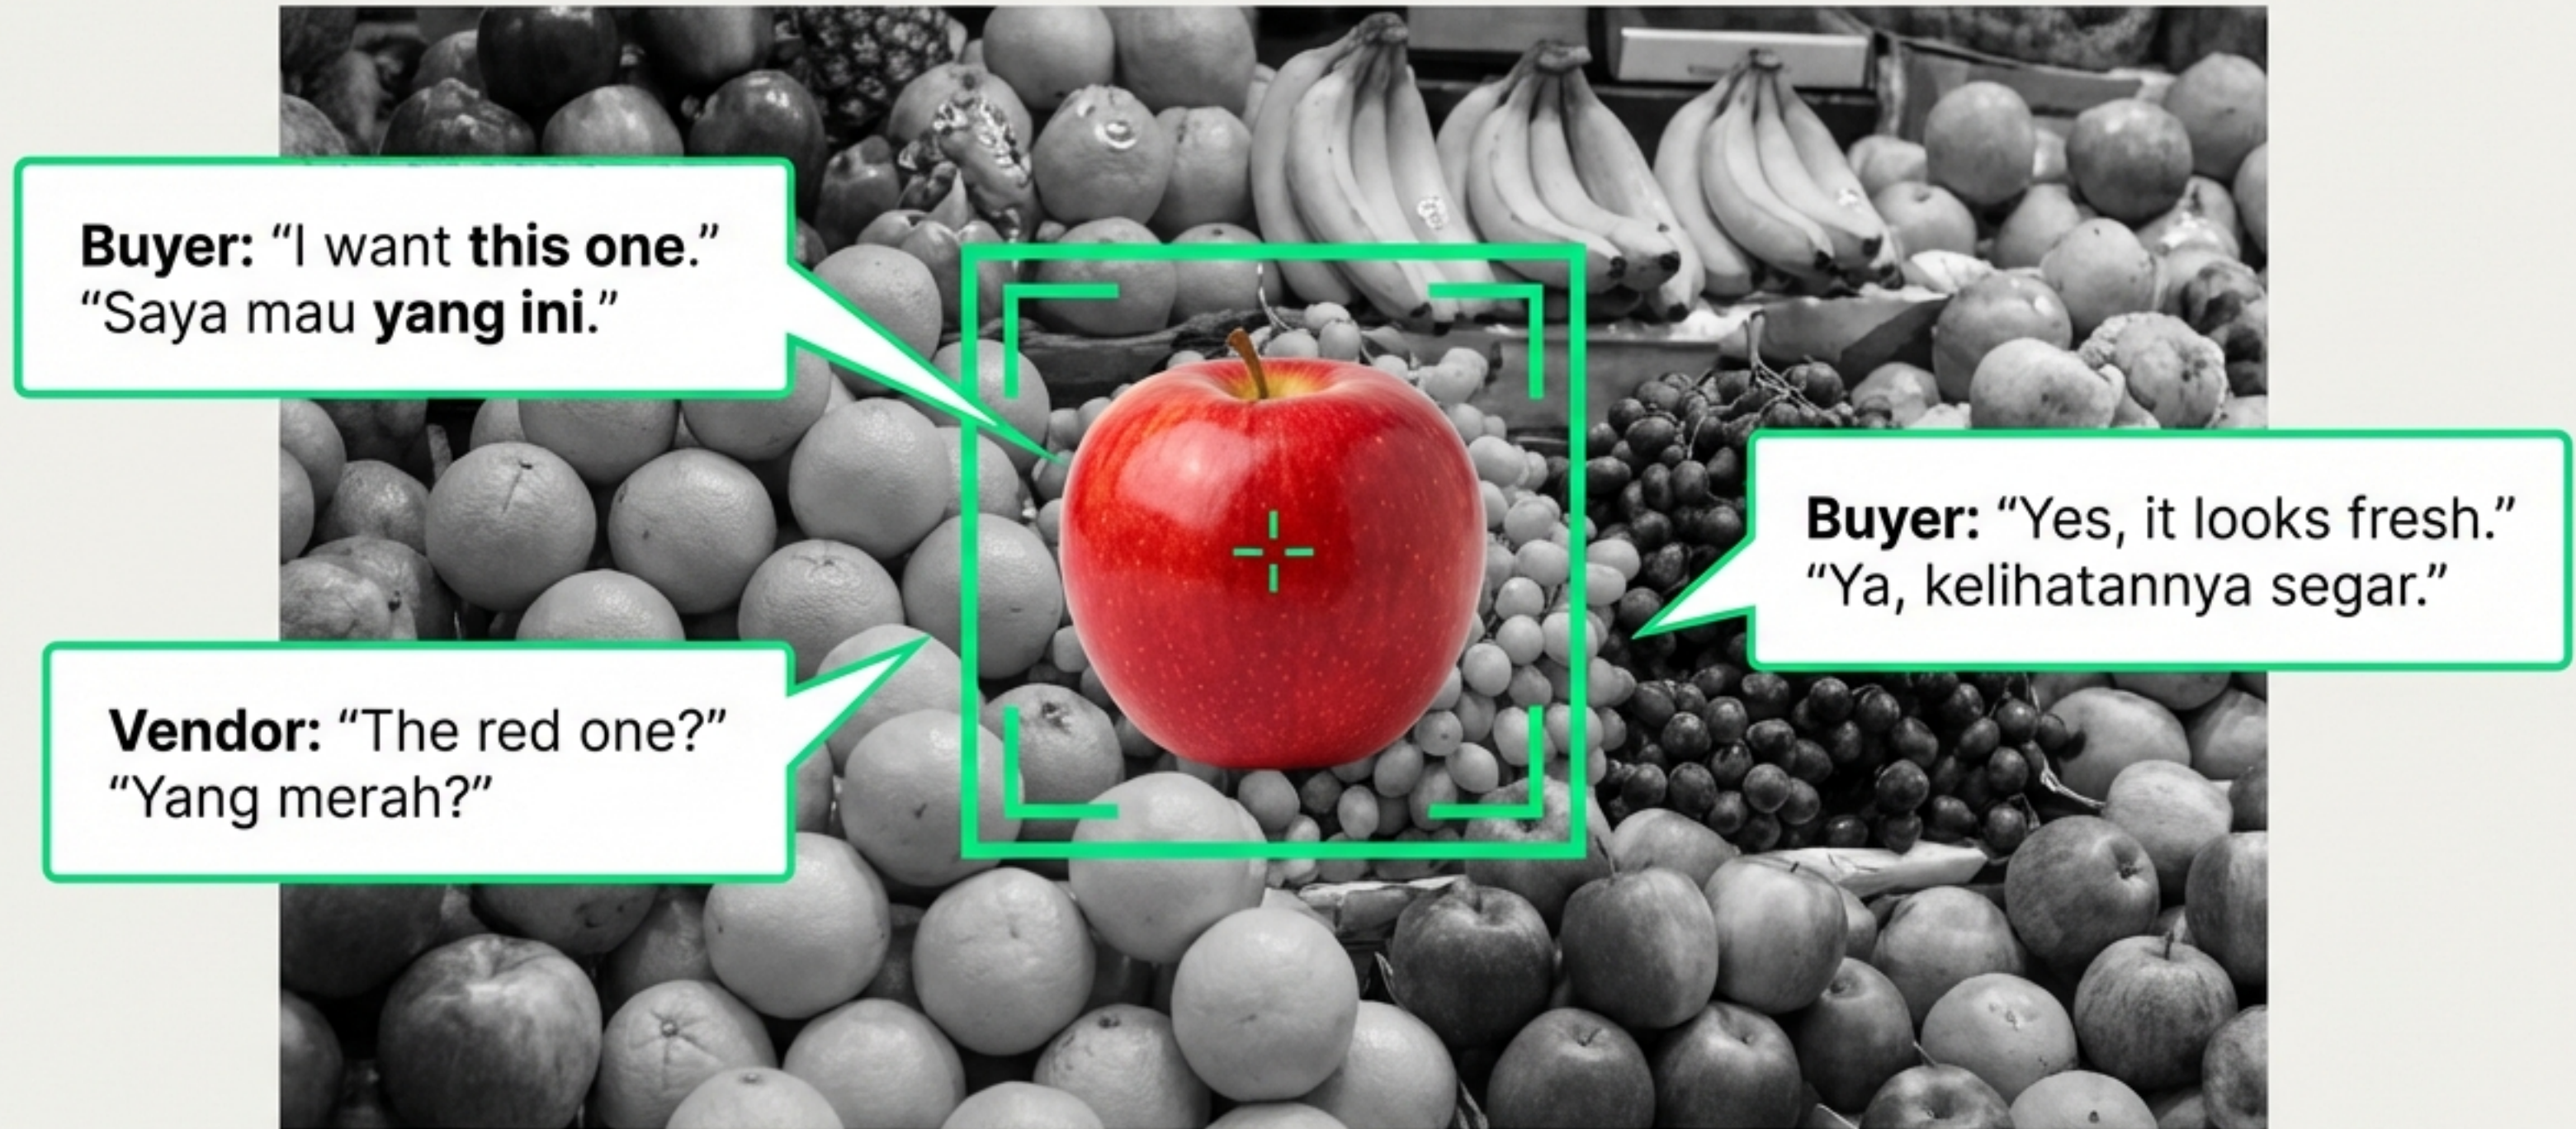

Scene 3: Market Selection

The background is a black and white photograph of a busy market. In the center, there is a white rectangular text box. Overlaid on the image are two green camera focus symbols, each consisting of a circle with a crosshair, positioned above and below the text box. Additionally, there are green L-shaped corner brackets in the top-left, top-right, bottom-left, and bottom-right corners of the image frame.

Objective:

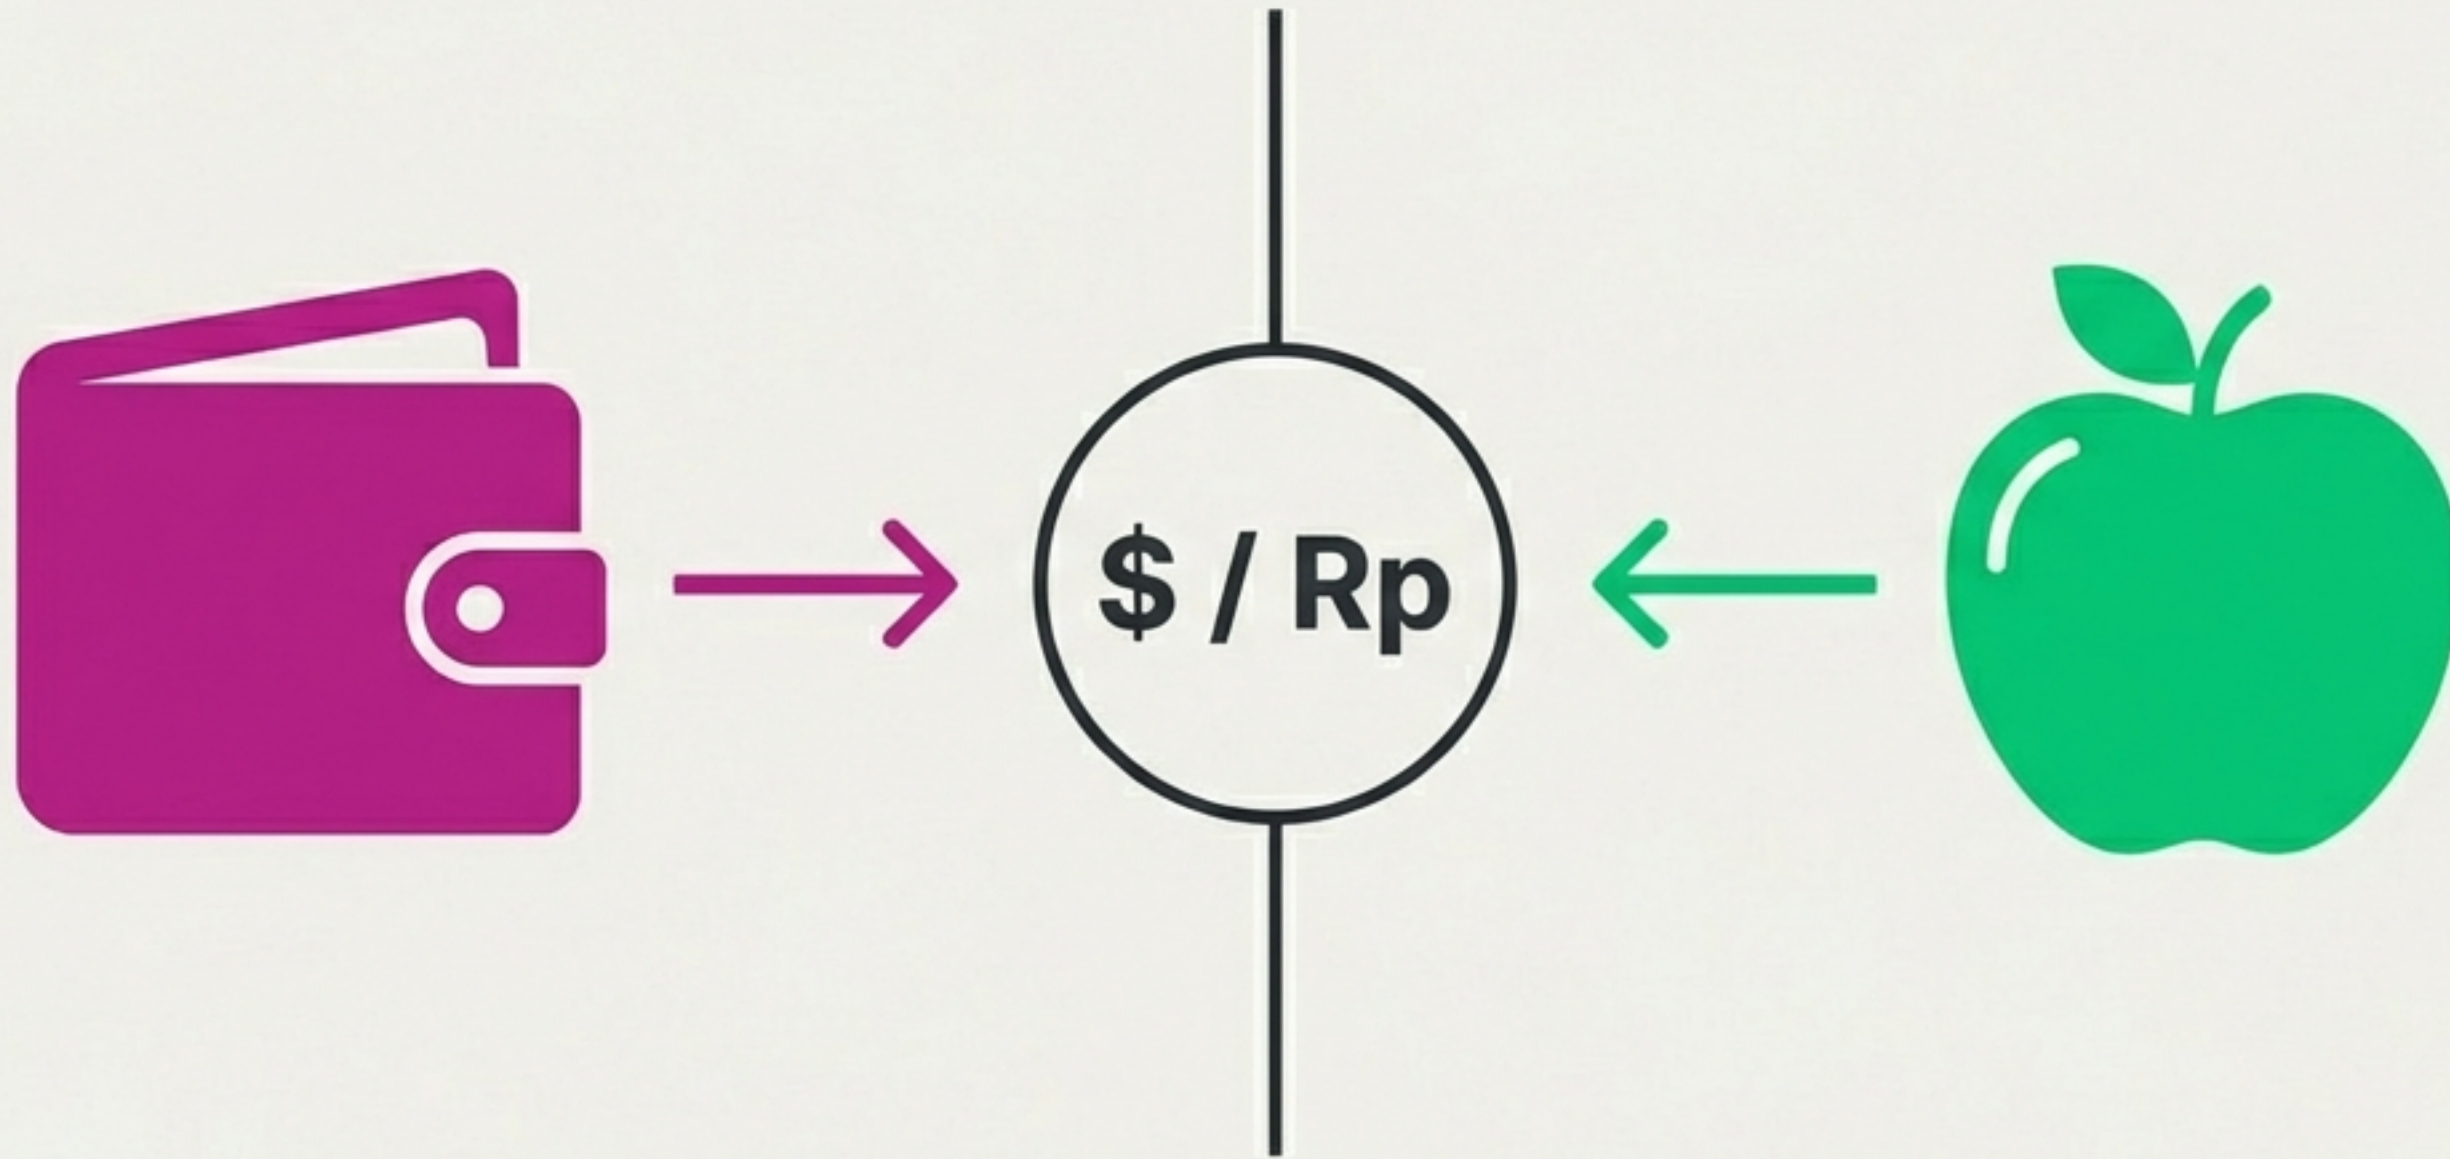

Filtering noise to make specific choices using a **Camera Focus metaphor**.

Locking Focus

Why is only one fruit bright Green? Because we are choosing specific things.

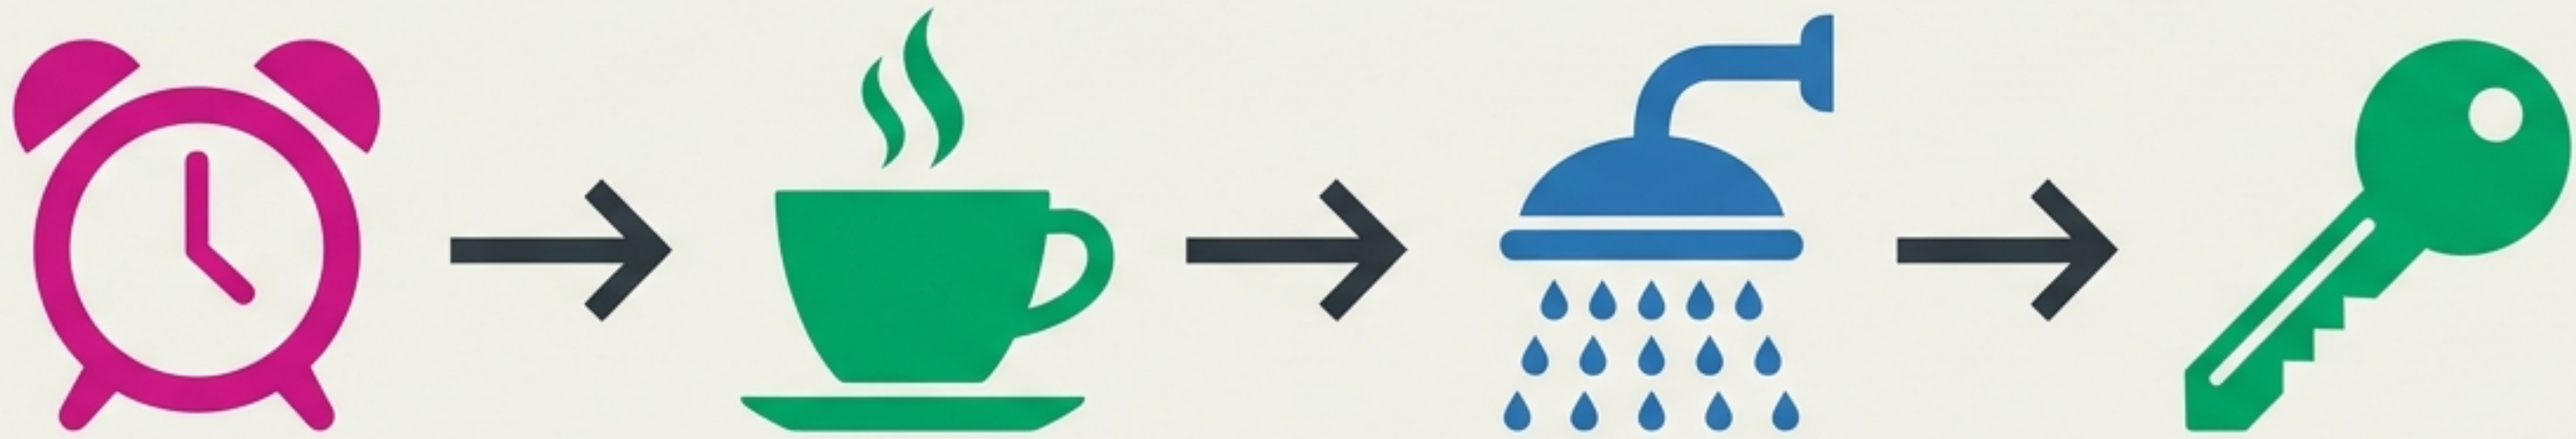

The Transaction Exchange

Buyer: "How much is it?" / "Berapa harganya?"

Vendor: "Twenty thousand Rupiah." / "Dua puluh ribu Rupiah."

Scene 4: Sequencing the Narrative

First

Inter Regular

Then

Next

Finally

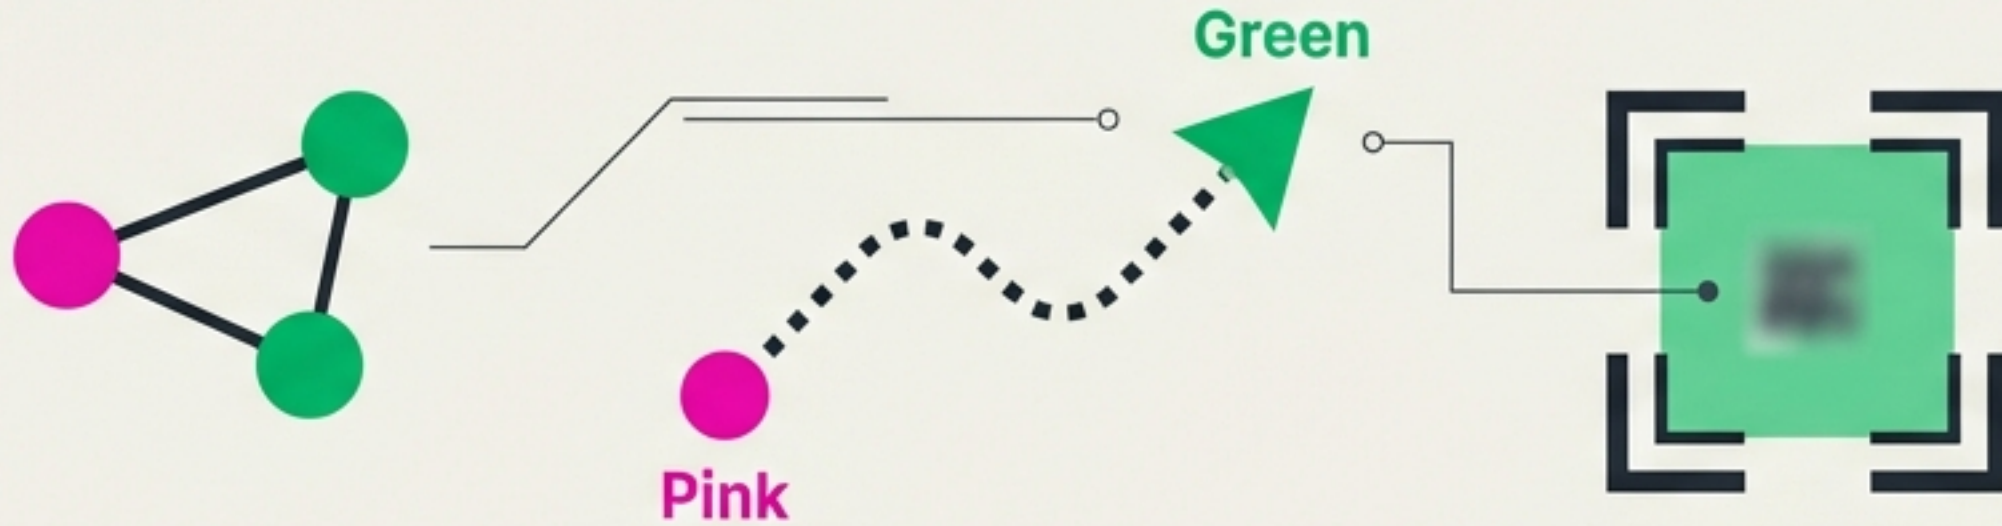

Constructing the Paragraph

**My morning is busy.
First, I wake up at
6 AM. Then, I drink
hot coffee. Next, I
take a shower.
Finally, I grab my
keys and go to work.**

*Pagi saya sibuk.
Pertama, saya bangun
jam 6 pagi. Kemudian,
saya minum kopi panas.
Selanjutnya, saya mandi.
Akhirnya, saya ambil
kunci dan pergi kerja.*

Visual Logic Summary

Connect: Map relationships (**Pink** -> **Green**).

Navigate: Identify the Need (**Pink**) to find the Solution (**Green**).

Focus : Filter the noise to select the **specific**.

Sequence : Link the data **points** to **tell the story**.
